8.2. Exposure controls**Engineering Controls**

Avoid generation of uncontrolled particles.

Personal protective equipment**Eye/face protection**

When airborne particles may be present, appropriate eye protection is recommended. For example, tight-fitting goggles, foam-lined safety glasses or other protective equipment that shield the eyes from particles.

Skin and body protection

Wear fire/flame resistant/retardant clothing. Cut-resistant gloves and/or protective clothing

Respiratory protection may be appropriate when sharp surfaces are present. When particulates/fumes/gases are generated and if exposure limits are exceeded or irritation is experienced, proper approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.
